

# Leaptel Opticomm Internet Plans

## Information about the Service

### Service Description

Leaptel's Opticomm Fibre Internet service is delivered via the Opticomm's network to the network boundary point of your premises (normally a device in your garage).

The Opticomm Fiber Internet service includes the following components:

- Broadband

### Availability

All Opticomm Fiber plans are available at selected coverage areas and subject to infrastructure availability at customer's premises.

To check for availability, please use the address checker at [leaptel.com.au](http://leaptel.com.au)

## Inclusions & Exclusions

### Service Speed & Guarantee

Actual throughput speeds may be slower and could vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Leaptel. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable.

CSG Waiver: The standard Monthly Charge and Setup pricing stated in the Information about Pricing section are based on new customers agreeing to waive the Customer Service Guarantee (CSG).

### Equipment required

If you do not already have the required Opticomm equipment installed inside your home, you will need to contact Opticomm to install the ONT. Opticomm can be contacted on 1300 137 800. Opticomm retains ownership of any equipment they install during the roll out. The equipment will be maintained and serviced by Opticomm.

If you choose to install the router for your internet in a place other than next to the ONT, you will need to organize internal wiring between the ONT and the router. Leaptel is not able to assist with this nor take responsibility for the internal wiring should it fail.

You need an approved Opticomm compatible router to connect your device to the Leaptel Opticomm Internet service.

### Minimum Term

Leaptel's Opticomm Internet plans are supplied on either a no lock-in contract term (customers are permission to terminate the service by giving 30 days' notice), or 24 month contract term (early termination fees apply). See the Minimum Total Cost applicable to each plan in the information about pricing section.

## Other Information

### Usage Information
