

Connect to your router either via WiFi or using an ethernet cable to one of the four black ports on the back of the router.

On your computer or phone open up your web browser and type in the following into the address bar:
192.168.1.1

When it asks you for a username and password please use the following details:

Username: admin

Password: password

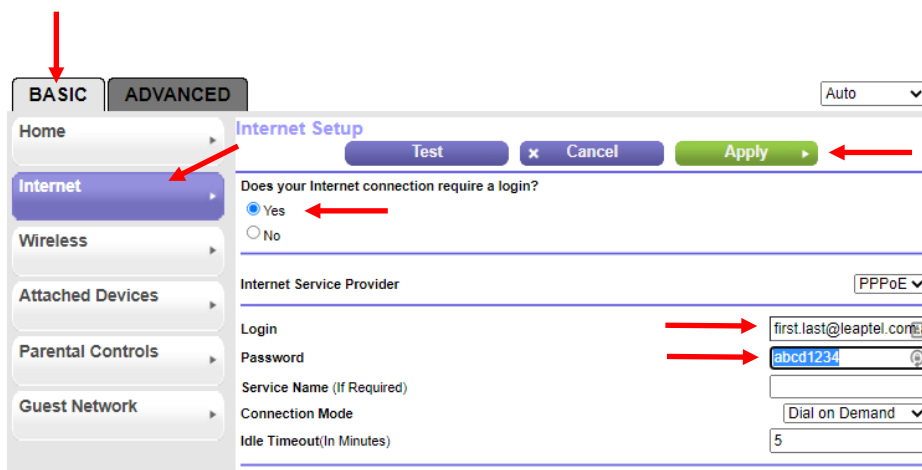

Once the router config page has loaded, please go to Basic > Internet

You will need to set the following settings:

Does your Internet connection require a login? – Set this to “Yes”

Set the login to be your supplied PPPoE username, the Password is the supplied PPPoE password.

Then Click apply at the top of the page.

Once the settings have been updated, the router should then reload and connect up with LeapTel.
