

Router Connection Guide - eero 7 & pro 7

Lynham Networks

These instructions explain how to connect your eero to the Lynham Networks' network. Please contact support if you have any questions, our contact details are at the bottom

With your compatible smart phone, download the eero mobile app from either the Apple App Store or Google Play. Once you have downloaded the app you will need to make an account and then follow the steps in the app.

When it asks you to connect your eero device to the internet follow the steps below.

Once you have completed working through the setup in the eero app your connection will be ready to use.

Once you have completed the setup in the eero app to the point it asks you to plug the eero into your internet connection, follow the steps below to connect.

1. Locate your Lynham Networks ONT or wall port
2. Connect the included ethernet cable from either port on the eero device to the ethernet port of your ONT/ wall port
3. Now that you have your eero connected, continue to follow the steps in your app.

Fibre to the Premises (FTTP) ONT

Ethernet wall port
